DETAILED ACTION

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

LUO US 2005/0073783 discloses parallel redundant power system and control method for the same.

YAMAMOTO 5,796,601 discloses a rectifier control system with rectifiers in parallel operates constantly by ensuring balance between the rectifiers with respect to output voltage and current.

APPLICANT'S admitted prior art teaches wherein each of the multiplicity of backup power supply modules comprises an input current balancer.

Allowable Subject Matter

Claims 1-15 allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or suggest an emergency power system wherein each of the multiplicity of backup power supply modules comprises an input current balancer for equalizing the input currents of the multiplicity of backup power supply modules with each other based on an average of the operation status information of the multiplicity of backup power supply modules.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
